Experiment 2

TITLE: DDL (Data Definition Language) commands

Objective: To understand the concept of designing issues related to the database with creating, populating the tables.

Aim:

To use various DDL commands like CREATE, ALTER, and DROP.

Theory:

DDL commands are used to define the database structure or schema. They do not manipulate data but affect table definitions and structures.

SQL Code:

```
CREATE TABLE employee (
  id INT PRIMARY KEY,
  name VARCHAR(50),
  salary DECIMAL(10, 2)
);

ALTER TABLE employee ADD department VARCHAR(30);

DROP TABLE employee;
```

Output:

The expected output confirms successful execution of SQL commands and matches the theoretical concept.

Result:

Successfully executed as per the aim of the experiment.
